

## installation manual

# by Jan Melis for Sywawa **Cube**

### advice:

- Before installing a parasol in the Cube you have to fill it to its maximum weight with water.

Release the knob of the Cube by turning it anti-clockwise and close the Cube with the knob by turning it clockwise.

- Make sure the knob is fixed tightly into to Cube.

- When the Cube is exposed to intense direct sunlight make sure the knob is released to let air run in or out the Cube.

### installation of the parasol in the Cube

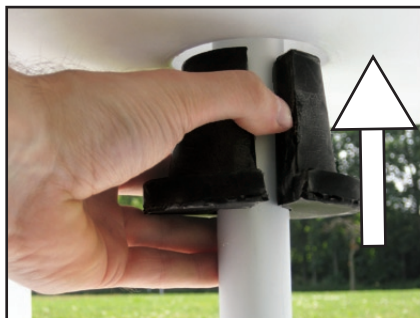

Place the Cube on the ground with the sunk square facing downwards.

Place your parasol in the opening of the Cube. The pole is automatically centered in the bottom of the Cube.

Fix the clip to the pole in the Cube with the ring facing downwards.

Push the clip upwards into the upper hole of the Cube.

Push the clip as high as possible until the pole of the parasol is tightly fixed.

Enjoy the sunshade.

### choose the right clip for your parasol

The Cube can be fitted with 2 sizes of parasol clips.

The smallest clip is suitable for parasols with a pole of  $\varnothing$  29 to 39 mm.

The clip with the big center hole is suitable for parasols with a pole of  $\varnothing$  40 to 50 mm.
